

# Belkin Stage™ App

Do more with less.

## The Belkin Stage app for iPad combines the convenience of a document camera with the power of an interactive whiteboard.

The iPad is a powerful teaching tool—easy to carry, so you can plan and prepare lessons at your convenience, and a remarkable multimedia resource for one-on-one interactions with students.

Belkin created the Stage app to extend the iPad's remarkable teaching potential to an entire classroom by combining the presentation functions of a document camera and interactive whiteboard. Simply connect your iPad to a projector, TV, or monitor to share images, objects, and ideas with the class.

Stage lets you draw and make notes over live video and images to create engaging, interactive tutorials. Display pictures and objects using the iPad camera and sketch, write, label, or laser-point in real-time. You can even save videos of your presentations to use again later, or share them online.

The Stage app is part of a portfolio of education solutions from Belkin designed to enrich student and educator experiences with technology in the modern classroom.

### Key Features and Benefits

The Stage app combines powerful features found on secondary devices, like document cameras and interactive whiteboards, into a simple and accessible iPad application.

- **Document camera function:** Captures live video.
- **Drawing function:** User can overlay text on live video.
- **Label function:** User can overlay labels on live video.
- **Video output function:** All video and interactions can be output via wired or wireless (airplay) connection.
- **Coming soon:** Version 1.1 will include full record and upload capabilities.

### Belkin Tablet Stage

A perfect complement for the Stage app, the Belkin Tablet Stage helps you make the most of your tablet device in a classroom environment. A stable, adjustable platform holds your tablet above a staging area, where the tablet camera can focus on textbooks, worksheets, or objects for classroom discussion. Connect a projector or monitor for a powerful presentation tool. The Tablet Stage will be available from Belkin in April 2013.
